

## BANKERS STAKES TO-DAY

The Great 2-Year-Old Event of the Meeting.

## TROTTING AND PACING

Great Mixed Race Between Horses With 2113 Marks—Large Fields in Running Contests—The Judge Complimented.

In spite of it being Sunday and the weather exceptionally fine, the turfmen gathered at the Montana put in most of the day resting and talking over Saturday's races and the coming events. There was one subject that all the horsemen appeared to agree on, much as they might differ on the relative merits of their favorite horses, they all freely acclaim that the association did a splendid stroke of business in retaining the services of W. P. McNeir of Wichita, Kas., as judge. He is in their opinion a thorough horseman, and on Saturday showed his metal in his successful efforts in getting the harness horse event started. Those who patronize the pool boxes also have confidence in Mr. McNeir and that he will not permit jobbing of any description; and further, that the rider or driver who can fool him will have to get up early in the morning. With Messrs. Laywell and Loebe supporting him in the judge's stand, Mr. McNeir has as able and good counsel as anyone in his position could desire. The betting at this meeting promises to be unusually heavy, and it is doubtful if there are any mutual tickets like those of the famous Roanoke ones of last year that paid their lucky holders \$387.20. That mutual had the effect of making a good number of dark horse players, who are on the lookout for snags.

The programme for to-day contains some excellent races, and the opening 2-year-old event, the Bankers' stakes, gives every indication of being an exciting race. Mr. Daly's colts, under the care and training of Bob Smith, show good form and will undoubtedly have many backers. Model of the California stables will carry the money of the Pacific coast representative. He is a crack 2-year-old, having won seven races this year. The Spokane colt, Chinook, will also be well backed by the Washington crowd, as in her work she has shown a gain that by many is thought to be a winner. Tom McNeir's filly, Marietta, is untried, but has also shown up well in her work. It will be a great race.

The lovers of harness horses will find plenty to interest them. In the trotting and pacing race the four fastest horses entered, that have ever started on a Montana track and it will undoubtedly take good guessing to pick out the winner. The horses entered are the pacing wonder, Prince Almont, 2:13½; Mikado, 2:13 and the two trotters Kiamath, 2:13½, and Robbie P., 2:13. It is expected that the track record will be broken in this race. The 2:16 trotting race should not be so slow either, such horses entered as Dan Velez, 2:18; Ida D., 2:17½; Alto, 2:17½, and R. D. F., 2:21½. The pacing and trotting mixed race does not appear on the original programme published except that a special event is set for to-day. The management have however added another race, so that there will be five races in all at the track. The extra is a running race that has nine entries. The other running race of the day has 10 entries, and these unusually large fields should provide a day of great racing.

The entries for to-day's races are as follows: First race, running, five-eighths of a mile, Bankers' stakes for 2-year-olds. Value of stakes, \$700. T. McNeir nominates b. f. Marietta and b. f. ## LEANS GET REVENGE.

The Fats Were Badly Laid In Yesterday's Return Match.

The Leans reaped their revenge in great shape yesterday afternoon, beating their large and husky brothers by a score of 33 to 28. The teams were not made up of the same men who played two weeks ago, both teams having put in some new men to strengthen their lines. At least that is the reason given for leaving out several of the original old-time and only Fat and Lean men. Both teams appeared to have injected more muscle and sprinting material into their lines. It was a game of endurance, more than fine playing, and the Fats could not stand the racket and were worn out by the end of the fifth innings. Each man on an average traveled about 10 miles running bases. The game on the whole was not as amusing as the former match, though there was plenty of fun for the spectators, who were out to the extent of about 400. Esterbrook, the pitcher for the Leans, nearly killed one of the fat men in the first half of the first inning. Cochran was standing in the coacher's box near first base with his back to the diamond. Esterbrook had the ball and intended throwing it to first base, but instead of doing so threw wild and struck Cochran on the back of the head with the ball, knocking him into an insensible condition. He was quickly brought to, however, after about three-quarters of a bucket of water had been thrown over him. A great feature of the game was the last half of the eighth inning, when the Leans scored 16 runs.

For the Leans, Barneyback did some splendid playing, scoring the only home runs of the game in the fourth and eighth innings. He also broke his share of bats and knocked the trade mark off a number of balls. Dr. Spelman's wonderful fielding won rounds of applause from the spectators. Esterbrook pitched two innings and then changed places with O'Neill by going to left field. Maloney was a good game at center field. Sullivan played third base and for a new player, did remarkably well. For the Fats, Kimball had the distinction of never fanning out, and played well all round. Williams pitched his usually hot ball, and Cochran did some very hard hitting. Brennan also surprised his friends.

The score was as follows:  
Leans.....0 6 1 7 1 2 0 16 33  
Fats.....1 0 1 2 2 4 5 28  
The Leans won by five runs at the end of the first half of the ninth inning so did not run the score up any higher by going to the bat in that inning.

How Lightning Causes Milk.

Milk is very sensitive to changes of temperature and of atmospheric conditions. Electricity is produced by or follows great and rapid meteorological changes. Lightning is the discharge which comes on account of electrical inequalities, and it is a well known fact that this produces chemical changes in the atmosphere. Thunderstorms represent the greatest activity of electrical phenomena, and the very best authorities give it as their opinion that the electricity generated during the prevalence of such storms is absorbed by the milk in such a manner as to cause it to undergo a complete chemical change.

## DO YOU WANT A JOB?

Or Are You Trying to Find the Right Kind of Help?

The STANDARD in its "cheap ad" columns affords the public a valuable medium of exchange as between persons seeking situations and persons desiring help of any kind. To the former the rates are only one cent a word, and to employers advertising for help two cents a word for the first insertion and one cent a word for each subsequent insertion. As the STANDARD's circulation embraces the entire state the value of such advertising is apparent. Hundreds and thousands of people inspect the "cheap ad" columns every day.

Dust is one of the chief annoyances of a transcontinental trip, but the Great Northern is entirely free from it; the roadway is stone ballast.

Cleanliness in traveling is the one thing desired. Travel by the Great Northern and you will be clean. No dust on this line; rock ballasted roadbed.

Mulvehill & Jordan, who have secured the lunch counter privileges at the race track, have got opened up in good shape. They put up a first class meal and those desirous of taking meals on the track can get good service.
